Professional Experience

Senior Software Engineer, Capital One, Virginia

Jul 2026 – present

Software Engineer, Capital One, Virginia

Jun 2021 – Jul 2026

- Owned the architecture, development, and deployment of the microservices platform powering the company's bank fraud casework using Java/Spring Boot, Python, and Kafka on AWS, processing 80k+ daily transactions (200k at peak) for tens of millions of customers.
- Reduced customer support call duration by 52% (84s to 40s) by building TypeScript, Angular, HTML, and CSS components integrated with agentic AI for automated summarization and note-taking.
- Led 3 engineers and a cross-functional workgroup to migrate the fraud case platform to a new payment network, a critical workstream to convert all bank customers, completed with zero service interruption.
- Cut disaster recovery time from 2 hours to 15 minutes by redesigning the multi-region failover strategy, developing automated runbooks, and improving monitoring.
- Directed a team of 5 engineers building an agentic AI tool that converts Slack threads into reusable documentation; selected as a top-5 winner among 120+ teams.
- Designated company AI champion: trained 10+ teams and 100 developers across the company in AI tooling (Claude Code, Windsurf) and best practices.
- Engineered zero-downtime data tokenization of 14M+ MySQL rows strengthening data privacy and maintaining PCI compliance.

Senior Product Support Engineer, SevOne, Delaware

Sep 2018 – May 2021

- Reduced troubleshooting time by 80% through the development of custom automation scripts, earning 'Support Person of the Year'.
- Mentored over 12 engineers in databases, networking, and Linux management.

Freelance Software Developer

Apr 2013 – Sep 2018

- Built websites and tools purchased by 400+ customers; taught programming fundamentals, data structures, and algorithms using Python and Java.

Education

- Wilmington University | M.S. in Information Systems & Technology, 2020
- Franklin & Marshall College | B.A. in Political Science, 2014

Skills

- **Languages:** Java, Python, TypeScript
- **Frameworks & Databases:** Spring Boot, Angular, MySQL, PostgreSQL
- **Tools & Cloud:** Camunda, CI/CD, AWS (ECS, SQS, RDS, Lambda), Kafka, Claude Code, Git, Agile
